Educational value/ Learning Objectives:
--

The game:

- Empowers entrepreneurs: the game helps you review and enrich market insights and teaches you to navigate the entrepreneurial journey.
- Promotes resilience: because the game focuses on adapting strategy and the 'search' that characterizes the early stages of entrepreneurship, it helps budding entrepreneurs face those challenges.
- Encourages resourcefulness: entrepreneurship requires a lot of 'figuring out'. Through the game, entrepreneurs exchange information and can benefit from and build on collective knowledge.
- Promotes collaboration among colleagues: the game fosters an environment where entrepreneurs learn to support each other.
